## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/10/2005 has been entered.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shatas in view of Beckhart et al. and further in view of the applicant's admitted prior art. Shatas discloses a cassette pod body with a top panel, a bottom panel, two side panels, and a front panel (10); and a plurality of ribs formed on the inside surface of the side panels and on the front panel (see Fig. 1). Shatas discloses all the limitations of the claims, but it does not disclose a plurality of sensors located in a housing in a front panel of a cassette and it does not expressly disclose a cassette pod door. However, Beckhart discloses a similar device that includes a plurality of sensors (30, see col. 2, lines 52-53, 84, 86, 88, 90) located in a housing in a front panel (see Fig. 1) of a cassette for the purpose of aligning a robot arm so that a semiconductor wafer does not bump into the walls of a cassette (see col. 2, lines 13-15). It would have been obvious for a person of ordinary

skill in the art at the time of the applicant's invention to modify Shatas by utilizing a plurality of sensors located in the housing in the front panel of the cassette, as disclosed by Beckhart, for the purpose of aligning a robot arm so that a semiconductor wafer does not bump into the walls of a cassette. Additionally, the applicant has stated that it is known in the prior art to utilize a cassette pod door on a cassette pod for the purpose of covering the cassette pod door opening when the cassette pod is not in use (see Fig. 2, item 28, and Paragraph 6 of the specification). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to utilize a cassette pod door on a cassette pod for the purpose of covering the cassette pod door opening when the cassette pod is not in use.
